Graduate of a German university. Eligible to apply for EU Blue Card upon job offer. Available from August 2026.

PROFILE

Product Manager with 5+ years of experience building and scaling software products from concept to launch. Background in technology and business, combining strong technical fluency with business strategy to deliver measurable impact. Proven track record in defining product vision/strategy, leading cross-functional teams, aligning stakeholders, and driving execution in fast-paced environments. Strong background in data-driven decision-making, experimentation, UX research, workflow automation, and AI-powered product solutions.

WORK EXPERIENCE

Holidu GmbH - Product Manager (Part-time) www.holidu.de

2024 - 2026

Data-driven decision-making | A/B testing | KPI metrics definition | LLM feature delivery

- Formed hypotheses, ran A/B tests, analyzed performance, and iterated on product improvements.
- Delivered multiple features driving >7% conversion uplift by translating user insights into actionable requirements, ensuring quality through QA, and validating performance via A/B testing.
- Optimized user journey by building dashboards, analyzing user behavior, and identifying friction points.
- Defined LLM feature KPI metrics, built an evaluation framework, and systematically optimized model outputs, ensuring high-quality responses and improving QA efficiency significantly.

Market research | Competitive analysis | User research

- Conduct user analytics, quantitative research and market research to determine features for development.
- Implemented a UX research tester acquisition pipeline to enable usability testing and product validation.
- Delivered an LLM-based customer feedback system analyzing 20k+ multi-channel reviews and automating weekly reporting, enabling faster, data-driven product iterations.

LINE Taiwan - Product Manager www.line.me

2020 - 2023

End-to-end product delivery | Stakeholder management | Product strategy

- Led product launch, defined product positioning and GTM strategy, scaling the user base to 700k+ in 1 year.
- Defined product roadmap with stakeholders, collaborated with 10+ cross-functional and international teams, identified technical constraints early, and drove trade-off discussions across teams.

Data analysis | User research | User-centric design

- Defined user research goals, conducted 50+ interviews, and translated findings into product decisions.
- Reduced onboarding drop-off from 64% to 20% by uncovering friction points (from data analytics tools, user interviews) and prioritizing high-impact product changes in the onboarding journey.
- Used R to model product adoption, forecast user engagement, and inform resource allocation decisions.

Agile development | Technical fluency | Prototyping

- Translated user and business needs into user stories, acceptance criteria, and wireframes, ensuring clear alignment between stakeholders, design, and engineering.
- Built a strong understanding of technical architecture and APIs to assess feasibility with engineers.

EDUCATION

Ludwig-Maximilians-Universität München

2023 - 2026

Master's degree, Management and Digital Technologies (Grade: 1,8)

- Master's Thesis - Mapping AI agents: a systematic review using LLM-based extraction
